EMS END OF YEAR EXAMS REVISION ADVICE

This guide had been put together to show you how you can help your son/daughter revise and prepare thoroughly for their end of year exams. Each subject that they will sit an exam is included in this booklet. Subjects such as Art, Drama and Qatar History will not be examined in the exam week, due to the nature of the subject but instead are being assessed through lesson based tasks.

To revise effectively pupils should try to do an activity rather than just reading the information. By processing the information and re-interpreting it in some way the content is more likely to be remembered. Examples of how this might be done include:

- **Read and re-draft**
- **Condense notes onto cue cards or Post-it notes**
- **Highlight notes**
- **Be tested by a family member**
- **Use example questions**
- **Record, rewind, replay**
- **Mind Maps - <http://www.youtube.com/watch?v=4wZ5wV5dPZc>**
- **Lists**
- **Storyboards**

To make something memorable your child should be encouraged to use **HAIR** - Humour, Association, Imagination and Repetition

Remember the importance of taking regular breaks. Our concentration span in the course of 2 hours dips and follows a bottom line but if we break for 10 mins every 20 mins our concentration levels are heightened so our brain function follows a top line.

Parents can help in a number of ways:

- Ensuring that your child starts to revise early, a little and often.
- Help them to plan out what will be done when to ensure that all topics are covered by the exam.
- Discuss the progress of the revision regularly with your son/daughter to make sure that they stay on track throughout the revision period. 'Milestones' and small rewards can be very effective in helping them through what can be an onerous experience.
- Getting involved in the revision. Asking your child to answer questions or explain what they have revised. Get your son/daughter to write themselves questions, then test them on the answer two nights later. Create lists of facts to remember and test them on it.
- Encourage your son/daughter to switch off their mobile phone, TV and other electrical devices so they can concentrate fully on revising and nothing else.
- The importance of revisiting topics as often as possible in order to commit the information to our long term memory is one of the best ways to revise. Without going back over a topic after it is originally studied, 80% of the information is forgotten. We hope you find this guide useful and informative.

The Exam Schedule is available on our school website under parent resources.

Further revision materials is also available on our Weebly site.

If you have any questions please do not hesitate to contact the subject contact teacher
